

QUALITY POLICY

qsd2 Ltd. is committed to fully complying with the industry's professional standards and other requirements undertaken by the company, to reduce the energy consumption that increases environmental emissions that cause global warming, to promote the use of renewable energy for its own merits and to reduce environmental emissions in the implementation of its processes in accordance with the ISO 9001:2015 Amd.1:2024 (en) system standard modifications. The company's primary objective in its **architectural product design, manufacturing and wholesale distribution activities** is to ensure the continued delivery of impeccable **quality design**, product manufacturing and wholesale distribution at **optimum profit levels**. It does this by continuously improving the processes and effective operation of the quality management system it has implemented.

How **qsd2 Ltd.** achieves this:

- After reviewing the information provided, the company aims to get to know the needs of interested parties and prospective customers, and to make the necessary additions, clarifications and consultations, taking into account the many years of professional experience of its staff, so that, in addition to the expressed needs of customers, their unstated requirements are also met.
- When communicating with customers and suppliers (including subcontractors), it ensures that the assessed and defined needs are clear and feasible for the profession during implementation.
- In all phases of its business activities, the company is guided by the requirements of the contract, order, professional standards, legal requirements and the full compliance with them by it and its partners.
- It develops, manufactures and markets high quality and reliable architectural products that enable it to meet growing customer needs and expand its customer base.
- It makes its products competitive at the lowest possible cost. It strives to develop, manufacture and market architectural products that meet the latest requirements, using state-of-the-art technologies.
- It pays constant attention to the acquisition and application of advanced, up-to-date professional knowledge.
- It reviews activities with a significant impact on quality in such a way as to ensure that the result fully meets the client's requirements.
- Its quality management system also includes the assessment and qualification of its suppliers. It also promotes the reliable and consistent quality of its products through cooperation with its suppliers, including paying special attention to partners in product development and manufacturing.
- The company is committed to fulfilling its obligations and meeting the needs of its customers to a high standard:
 - through its organised activities,
 - by reducing its internal costs and increasing its efficiency,
 - by improving its efficiency and preparedness
 - by rationalising its capacity,
 - and by developing and offering additional related services beyond its existing products.
- Our customers operate in accordance with the rules defining the category of construction products in *EN 15804:2012 + A2:2019 and ISO 14025:2006 Principles and Procedures*. To comply with these, our company has started to obtain EPD certification for all products.

The specific objectives for the processes have been defined and documented by the management of **qsd2 Ltd.** Their fulfilment is monitored, the objectives are modified and updated according to the expectations of the customers and the company.

To achieve its quality objectives, the company expects the commitment of all its employees and suppliers (including subcontractors). To that end, it seeks to hire partners certified according to the MSZ EN ISO 9001:2015 standard when selecting suppliers.
